Who'S BoO

Brandon, Lauren, Kylie, Robert, and Ashley went trick or treating together. They each wore a different costume (a ghost, a pirate, Spiderman, a witch, and a ghost). At the end of the day, each of them counted the number of pieces of candy they collected. They each collected a different amount of candy (63, 77, 83, 54, and 84).

Figure out the costume worn by each person and the amount of candy each person collected.

1. Brandon was not a pirate.
2. The boys (Robert and Brandon) costumes included a pirate and Spiderman.
3. Lauren and Kylie collected a total of 161 pieces of candy.
4. The ghost collected 77 pieces of candy.
5. The pirate collected 83 pieces of candy.
6. Ashley and Lauren collected a total of 140 pieces of candy.
7. The witch collected the most pieces of candy.

(From http://www.edhelper.com/Halloween_Logic71.htm)

- 1) Who wore which costume and how much candy did each collect?

- 2) Write a problem solving recount of how you solved the problem. Label the steps I to IV for the problem solving steps.

Make a Halloween Logic Puzzle

Puzzling Treats

Abby, Brandon, Caitlin and Destinee went trick or treating. After going to four houses they noticed they each had starbursts, skittles, m&m's, and snickers.

- 1) Decide on which candy came from which house.

1

2

3

4

- 2) Write a set of clues that will enable someone to figure out which house gave away each candy. No clue should directly tell which candy came from any single house.

- 3) Are all of your clues necessary? That is, could you eliminate any one and still solve the puzzle.

- 4) Write your necessary clues on a separate piece of paper to exchange with another table.

- 5) As you solve the other table's riddle, compare and contrast their clues to yours.
