I'd like to get your feelings toward some of our political
leaders and other people who are in the news these days. I'll
read the name of a person and I'd like you to rate that person
using something we call the feeling thermometer.
Ratings between 50 degrees and 100 degrees mean that you feel
favorable and warm toward the person. Ratings between 0 degrees
and 50 degrees mean that you don't feel favorable toward the
person and that you don't care too much for that person. You
would rate the person at the 50 degree mark if you don't feel
particularly warm or cold toward the person.
If we come to a person whose name you don't recognize, you don't
need to rate that person. Just tell me and we'll move on to the
next one.
